ABOUT ME

CCE graduate (2025) currently pursuing a Master's degree, with experience developing and integrating software projects and a strong interest in expanding my professional expertise

EDUCATION

Lebanese International University (LIU) 2021-2025

Bachelor in Computer & Communication Engineering

focused on software development, computer systems, networking, embedded systems, and communication technologies, with hands-on experience through academic and practical projects

Master of Science in CCE (In Progress)

Lebanese International University

SKILLS

Java, JavaScript, Python, PHP, MySQL, Node.js, Express.js, EJS, REST APIs, Full-Stack Development

WORK EXPERIENCE

senior project -2025

Social Services Video Guidance Platform

React.js, Node.js, Express.js, SQL

- Developed a full-stack platform connecting customers with social service providers through video-based guidance and direct messaging.
- Implemented a video rating system that promotes highly rated content for improved user engagement.
- Built frontend and backend components using React.js, Node.js, and Express.js.
- Designed an SQL database and admin panel for content and user management

AI PDF Analyzer -2026

Python, OpenAI API, Node.js, Express.js, PostgreSQL

- Built an AI-powered PDF analysis platform that generates summaries, extracts key insights, and identifies formulas using OpenAI and Python.
- Developed a modern, responsive UI/UX with Google Authentication, subscription plans, and payment integration.
- Designed backend APIs and database architecture for document processing and user management.
- Created an admin dashboard for analytics, activity monitoring, and account moderation

Garage Platform | Full-Stack Web Application

Technologies: React, Node.js, Express.js, PostgreSQL, JavaScript, REST APIs, JWT

- Developed a full-stack garage management platform using React and Node.js/Express.
- Designed a relational PostgreSQL database and built secure REST APIs with JWT authentication and role-based authorization.
- Implemented inventory management, advanced search, Excel data import, and an admin dashboard.
- Applied scalable architecture, responsive UI/UX, performance optimization, and security best practices.

Certifications

Data Science, Machine Learning, NLP, and Neural Networks – Udemy

Full Stack Web Development – Udemy
